Statement by Azeezaly S. Jaffer **Vice President, Public Affairs and Communications**

Packages accepted by APX Logistics prior to the company's filing for Chapter 11 bankruptcy protection March 16 are beginning to enter the Postal Service network.

We are adding resources and increasing the number of drop-ship appointments at our Bulk Mail Centers to make sure these packages are delivered as soon as possible after they enter our network.

We are working with APX officials to move remaining on-hand mail volumes from the company's network to postal facilities and, by week's end, expect all APX packages to be within our system and on their way to customers.
