

## Version 7.0.0 – Release Notes

The *PostalOne!* 7.0.0 release is scheduled for the summer of 2004, and affects the following areas: CAPS/payment processing, data exchange, e-VS, and Owners features.

### CAPS/Payment Processing

With this release, postage payment reports, formerly known as Centralized Account Processing System (CAPS) reports, are available within the *PostalOne!* system. The Customer Care Center must grant users access to this tool before this functionality is available.

### Data Exchange

This release implements the interim changes for version 02-2 Mail.dat® files. The following files have a new field or accept new values in Mail.dat version 02-2 with interim adjustments:

File(s)	Field	Special notes
CPT	Rate Type	Now accepts value M.
CPT, MPU	Processing Category	Now accepts value CM.
HDR	Zone Matrix Date	New field. Must be alphanumeric and in YYYYMMDD format.
SEG	Principal Processing Category	Now accepts value CM.

Additionally, validation now checks to ensure that pound-rate minimums are met for presorted Bound Printed Matter (PS Form 3605-B) jobs.

### e-VS

With this release, e-VS:

- Accepts multiple permit numbers for a single customer.
- Allows only e-VS Admin and HQ users to view the Zero Volume report. This report is not available to any other users.

### Owners

This release includes the following changes for all customers with access to the Owner features in the *PostalOne!* system:

- Fee payments can be paid only once. Previously, clicking the browser Back button enabled users to pay the same fee twice.
- Users may now view the basic information about a facility in the *PostalOne!* system, including address, phone number, holiday schedule, and hours of operation. Additionally, all entries list the critical entry times for shipping Express Mail®, First-Class Mail®, Package Services, Periodicals, Priority Mail®, and Standard Mail™. Owners may view host facilities and BMEU facilities. To view unit profiles, click **Unit Administration** on the left menu bar, then enter information to find the appropriate facility. Click **Submit**, then click the name of the appropriate facility.
