All domestic and international price calculator and shipping label APIs will reflect updated pricing in XML responses, on shipping label images, and in the Shipping Services Files (see Appendix A for full list of price calculator and label APIs). For information on specific prices being updated, please go to https://about.usps.com/newsroom/national-releases/2021/1110-usps-announces-new-competitive-prices-and-two-new-mail-products-for-2022.htm To test updated prices, use a ship date of today in our test environment.

     - When <ServiceType>="PARCEL SELECT DE", <DestinationEntryFacilityType>="DSCF", and <Machinable>="True" are passed in the XML request and <SortationLevel> is not specified (i.e., null or "NONE" values) an error will return.
   - Reference Appendix B for sample XML request/response.

1. **Summary:** Effective April 3, 2022, USPS will enforce new Nonstandard Volume and Length Fees for parcels that exceed 2 cubic feet (3546 cubic inches) or have a length greater than 22 inches respectively. Reference [https://www.prc.gov/docs/120/120310/Notice.Delayed.Imp.pdf](https://www.prc.gov/docs/120/120310/Notice.Delayed.Imp.pdf) and [pe.usps.com/text/dmm300/notice123.htm](http://pe.usps.com/text/dmm300/notice123.htm) for details.
2. eVS Domestic Label API Updates:
   - Postage will be updated to include new Nonstandard Length and Volume Fees:

<table>
<thead>
<tr>
<th>Nonstandard Length Fees</th>
</tr>
</thead>
<tbody>
<tr>
<td>22&quot; &lt; x &lt; 30&quot; = $2 (for DDU entered packages)</td>
</tr>
<tr>
<td>22&quot; &lt; x &lt; 30&quot; = $3 (for DNDC/DSCF entered packages)</td>
</tr>
<tr>
<td>22&quot; &lt; x &lt; 30&quot; = $4 (for all other packages)</td>
</tr>
<tr>
<td>x &gt; 30&quot; = $7.50 (for DDU entered packages)</td>
</tr>
<tr>
<td>x &gt; 30&quot; = $11.25 (for DNDC/DSCF entered packages)</td>
</tr>
<tr>
<td>x &gt; 30&quot; = $15 (for all other packages)</td>
</tr>
</tbody>
</table>

   **Table 6: Nonstandard Fees**

   - Nonstandard length and volume fees could apply to a single parcel if above fee criteria are met.
   - New optional request tag `<ReturnFees>` with values (“True”/”False”) will be added to return new fee details in the API response when applicable:
     - When `<ReturnFees>"True", new `<Fees>` response tags will return in the RateV4 response to show breakdown of fees included in postage amount returned.
     - If `<ReturnFees>"True", but no fees apply to postage the new `<Fees>` response tags will not return.
     - When `<ReturnFees>"False" or not supplied, new `<Fees>` response tags will NOT return. Applicable Nonstandard fees will only be reflected in postage returned.
   - New response tag grouping `<Fees>` will return individual fee details when applicable.
     - `<Fee>` (group)
     - `<FeeType>` – values: “Nonstandard Length Fee” or “Nonstandard Volume Fee”
     - `<FeePrice>`
     - `<FeeInformation>` (group)
     - `<FeeInfo FeeInfoType="Mailentry">` – values: DDU, DNDC, DSCF
       - When destination entry is not applicable, `<FeeInformation>` response tag group will not return.
   - Example: DDU entry Nonstandard Length and Volume fees returned when `<ReturnFees>"True" included in XML request:
     ```xml
     <Fees>
       <Fee>
         <FeeType>Nonstandard Length Fee > 22 in.</FeeType>
         <FeePrice>2.00</FeePrice>
         <FeeInformation>
           <FeeInfo FeeInfoType="Mailentry">DDU</FeeInfo>
         </FeeInformation>
       </Fee>
       <Fee>
         <FeeType>Nonstandard Volume Fee > 2 cu. ft.</FeeType>
         <FeePrice>15.00</FeePrice>
         <FeeInformation>
           <FeeInfo FeeInfoType="Mailentry">DDU</FeeInfo>
         </FeeInformation>
       </Fee>
     </Fees>
     ```
   - When a Nonstandard Fee applies, Web Tools will update the Shipping Services File (SSF) D1 pos 44 Extra Service Code (ESC) field with the following values:
### Nonstandard Length Fees

<table>
<thead>

### 2.3.3 Maintenance

1. **Domestic Label APIs** will be updated to streamline logic when oversize pricing is supported to accurately populate the "OS" rate indicator in the Shipping Services File. Updates are backend and will not impact structure of XML request/response. (Deferred)
   - Impacted APIs:
     - eVS (Domestic)
     - USPSReturnsLabel

2. Effective 4/1/22, the RateV4 API will be updated to clarify the current ambiguous error message returned for Parcel Select Destination Entry (PSDE) Machinable DSCF requests when the `<Sortation>` value is invalid.
   - When `<ServiceType>"PARCEL SELECT DE", <DestinationEntryFacilityType>"DSCF", and `<Machinable>"True"` are passed in the XML request and `<SortationLevel>` is not specified (i.e., null or "NONE" values) an updated error message will return in RateV4 API.

3. Effective 4/8/22, a fix to the eVS Domestic API will resolve incorrect postage returning for select APO destinations (i.e., 09021).

### 2.4 Production Release: April 28, 2022

External testing: April 12

### 2.4.1 Maintenance

1. The Domestic Label APIs will be updated to remove current hard-coded logic and use the new Rate Engine oversize indicator when oversize pricing is supported to accurately populate the "OS" rate indicator in the Shipping Services File.
   - Impacted APIs:
     - eVS
     - USPSReturnsLabel
2.5 Production Release: May 26, 2022
External testing: May 16

2.5.1 Domestic Price Calculator API (API=RateV4) - Postage Visibility Updates

1. Summary: Web Tools will update the RateV4 API to allow integrators the option to return a streamlined breakdown of how postage was calculated for increased visibility.
   - New tags will be eligible to return in the XML response when <ReturnFees>="True" is provided in the request.
     - XML response <Fees> and <Attributes> groups will contain a comprehensive breakdown of how postage was calculated.
   - When <ReturnFees>="False" is indicated in the XML request (or not supplied), new tags will not return. However, fees will be reflected in the postage returned when applicable.

2. Oversize Updates - When oversize pricing applies to postage, Web Tools will return a new indicator in the XML response <Fees> group when <ReturnFees>="True" is provided in the request so that an integrator can see their package was priced as oversized.
   - New indicator with value of “true” (i.e., <Oversized>= “true”) will return when oversize pricing is reflected in the postage.
   - New indicator will not return if the package is not priced as oversized.

3. Dimensional Weight Updates - When dimensional weight pricing applies to postage, Web Tools will return a new <Attributes> grouping with dimensional weight indicators when <ReturnFees>="True" is provided in the request so that an integrator can see their package was priced using dimensional weight.
   - New XML response tags eligible to return when <ReturnFees>="True" and dimensional weight applies:
     - <Attributes>
       - <Attribute Key="DimensionalWeight" Type="RetailRate">50</Attribute>
       - <Attribute Key="DimensionalWeight" Type="CommercialRate">50</Attribute>
       - <Attribute Key="DimensionalWeight" Type="CommercialPlusRate">50</Attribute>
       - </Attributes>
   - New dimensional weight indicators will return the dimensional weight value used to calculate postage for each price type.
     - Attribute Key="DimensionalWeight" indicates package was priced using dimensional weight value returned.
     - Type="RetailRate" indicates postage returned in the <Rate> postage tag.
       - Note: any pricing that is NOT an explicitly published Commercial Base (CBP) or Commercial Plus (CPP) will return in this tag (i.e., Retail products or Commercial products such as Parcel Select Ground, Library Mail, and Media Mail etc.).
     - Type="CommercialRate" indicates published Commercial Base Pricing (CBP) returned in the <CommercialRate> postage tag.
     - Type="CommercialPlusRate" indicates published Commercial Plus Pricing (CPP) returned in <CommercialPlusRate> postage tag.
   - New dimensional weight indicators will not return if the package is not priced using dimensional weight.
   - The current <ReturnDimensionalWeight> optional request tag with "true"/"false" inputs which returns <DimensionalWeightRate>, <DimensionalWeightCommercialRate>, and <DimensionalWeightCommercialPlusRate> tags will remain unchanged.
     - These legacy tags will be deprecated in a future release.

4. Nonmachinable Fee - When Nonmachinable fee applies to postage, Web Tools will return a new indicator in the XML response <Fees> group when <ReturnFees>="True" is provided in the request so that an integrator can see their package was priced as Nonmachinable.
   - The new indicator will display the fee amount reflected in the postage returned.
   - The new indicator will not return if the package is not priced as Nonmachinable.

5. Live Animal Transportation Fee - When the Live Animal Transportation fee applies to postage, Web Tools will return a new indicator in the XML response <Fees> group when <ReturnFees>="True" is provided in the request so that an integrator can see their package was priced as Live Animal Transportation.
2.5.2 eVS Domestic Label API (API=eVS) - Postage Visibility Updates

1. Summary: Web Tools will update the eVS Domestic Label API (API=eVS) to allow integrators to optionally return a streamlined breakdown of how postage was calculated for increased visibility.
   - New tags eligible to return in the XML response when <ReturnFees>="True" is provided in the request.
     - XML response <Fees> and <Attributes> groups will contain a comprehensive breakdown of how postage was calculated.
   - When <ReturnFees>="False" is indicated in the XML request (or not supplied), new tags will not return. However, fees will be reflected in the postage returned when applicable.

2. Oversize Updates - When oversize pricing applies to postage, Web Tools will return a new indicator in the XML response <Fees> group when <ReturnFees>="True" is provided in the request so that an integrator can see their package was priced as oversized.
   - New indicator with value of "true" (i.e., <Oversized>="true") will return when oversize pricing is reflected in the postage.
   - New indicator will not return if the package is not priced as oversized.
   - Oversized packages will contain an "OS" (Oversized) value in the Shipping Services File (SSF) D1 pos 37 Rate Indicator field.

3. Dimensional Weight Updates - When dimensional weight pricing applies to postage, Web Tools will return a new <Attributes> group with dimensional weight indicators when <ReturnFees>="True" is provided in the request so that an integrator can see their package was priced using dimensional weight.
   - New dimensional weight indicator ("DimensionalWeight") will return the dimensional weight value ("50") used to calculate postage.
   - New XML response tags eligible to return when <ReturnFees>="True" and dimensional weight applies:
     - <Attributes>
     - <Attribute Key="DimensionalWeight">50</Attribute>
     - </Attributes>
   - New dimensional weight indicator will not return if the package is not priced using dimensional weight.

     - This legacy tag will be deprecated in a future release.

4. Nonmachinable Fee - When Nonmachinable fee applies to postage, Web Tools will return a new indicator in the XML response <Fees> group when <ReturnFees>="True" is provided in the request so that an integrator can see their package was priced as Nonmachinable.
   - The new indicator will display the fee amount reflected in the postage returned.
   - The new indicator will not return if the package is not priced as Nonmachinable.
   - Packages where the Nonmachinable fee applies to postage will contain the following Shipping Service File (SSF) inputs:
     - D1 pos 57 Surcharge Type:
       - "N1" (Nonmachinable Parcel Surcharge)
       - "S4" (Nonmachinable Letter Surcharge)
     - D1 pos 57 Surcharge Amount will contain the Nonmachinable fee
     - Note: Current logic for eVS Parcel Select Destination Entry and Lightweight (PSDE/PSLW) when <NextDay>=True which requires a Surcharge of "E2" will take precedence in SSF.

5. Live Animal Transportation Fee - When the Live Animal Transportation fee applies to postage, Web Tools will return a new indicator in the XML response <Fees> group when <ReturnFees>="True" is provided in the request so that an integrator can see their package was priced as Live Animal Transportation.
   - The new indicator will display the fee amount reflected in the postage returned.
   - The new indicator will not return if the package is not priced as Live Animal Transportation.
o Packages where the Live Animal Transportation fee applies to postage will contain the following Shipping Service File (SSF) inputs:

3.2.1 Sample XML Requests
This section provides sample XML requests to the test/staging environment that demonstrate some of the changes implemented to our APIs in this release. These requests are provided as a reference to aid in your understanding of the changes and in your integration with our updated APIs. You should still complete your typical testing and verification processes to ensure that your system is communicating properly with the most updated versions of the Web Tools APIs.

Please note that you must place your valid USERID into the request. Sample responses are provided below the sample requests to illustrate the changes that will occur to the XML schema. Please note that the data within the tags may differ depending on inputs provided. Areas of note are highlighted.
