Import Labels Via File Upload

Import multiple labels via our File Upload method by following the steps below.

1) Begin File Upload Process

- a) **Option 1:** Select the **Import Batch of Labels** tile located on the landing page.

The screenshot shows the USPS Label Manager interface. At the top, there's a navigation bar with links: Label Manager, Shipping History, Address Book, USPS Connect®, Direct Connect, Preferences, and SCAN Forms. A 'New Label' button is on the right. Below the navigation bar, the user is greeted with 'Hi Brittany!' and 'Account #: 41961'. A search bar prompts 'Enter a Label or Tracking Number to View Label Details'. The main content area is divided into two columns. The left column, 'Start Shipping', contains a 'Ship To' section with a 'Save to Address Book' checkbox and a search bar. Below this are fields for First Name, MI, Last Name, and Company. A 'Country' dropdown is set to 'United States of America'. Address fields include Street Address, Apt/Suite/Other, City, State (dropdown set to 'AL - Alabama'), and ZIP Code. There are checkboxes for 'Send notifications' and 'Hold for Pickup at Post Office™'. Two text boxes for 'Reference Number / Note' are present, each with a 'Max Character Limit: 90'. A 'Create This Label' button is at the bottom. The right column, 'More Print & Ship Options', features four tiles: 'Import Batch of Labels' (highlighted with a red box), 'Import from Marketplace', 'Create a Batch', and 'Manage Your Preferences'. The 'Import Batch of Labels' tile includes an icon and text: 'Import multiple labels from a file into a batch to edit within Label Manager'.

- b) **Option 2:** Select **File Upload** located on the Label Manager page.

2) Select File Type and Upload CSV File

 - To download step by step instructions on how to fill out the template, select **Download Instructions**.

- If your personal file uploads successfully, you will see a green **Upload Successful** message box confirming that the upload was successful. Select **Next** to proceed to the next steps.

Tell us about your columns

Now it's time to tell us about your columns. We call this process "Field Mapping". Map the column headers is how you tell Click-N-Ship where your CSV information should appear.

Instructions: For each dropdown in column two, select the closest match to name in column one.

Some rows are required and are marked with an asterisk and highlighted with a light blue marker. Assign your column headers to the corresponding column headers Click-N-Shipfields on the left. Your file may not have the same number of fields, and you only need to map the info you want to import. You can edit the mappings if needed. Unmapped fields will not be imported. Not all fields are required.

Apply a Saved Mapping

(a) Select Clear Mapping (b)

- c) Verify that your **file's column headers** have been mapped to the Click-N-Ship® Label Manager fields.
- d) If a field is not correctly mapped, you may select another field from the **Mapping Recommended** dropdown.

* Required

Recipient Information	Mapping Recommended	15 of 15 Mapped Fields
* Recipient ZIP Code	Recipient ZIP Code	Mapped (c)
Recipient Phone	Recipient Phone	Mapped

(d)

- e) To save the current filed mappings as a template for future CSV uploads, enter the **Field Mapping Name** and select **Save as New Mapping** to save the template (*optional*).
 - i. *Note, unmapped fields will not be imported.*
- f) Otherwise, if all the information is correct and you would like to proceed with importing your labels, select **Confirm Mapping & Import Labels**.

Make subsequent uploads a streamlined process. (Optional)

You have the option of saving the field mappings as a template for future CSV uploads. If you plan to import this CSV template regularly, type in a name, we will save it for future use. (Leave blank if you don't want to save it.)
