

# Splooosh!

Place your markers on the corner frogs. Highest roller goes first. Roll one die. Hop that number of spaces. When you land on a red dot, draw a card. Follow the directions or answer the true-false question. If you answer the question correctly, you get to stay on the lily pad. If you are incorrect, you have to go back three lily pads. Only one frog can be on a lily pad at one time. So when you land on an occupied lily pad, the other frog goes sploosh and has to swim back to their home lily pad and start over again. The first frog to arrive at the home pad wins the game. You must have an exact count to land on the final lily pad. Happy hopping!
